---

**Frontend:** HTML, CSS, Bootstrap, JavaScript, React.js\*

**Backend:** Python, Express, Node.js

**Databases:** SQLite

**Other skills:** Blockchain

\*courses yet to be completed

## PROJECTS

---

### **Todos Application ([amarkumartodo.ccbp.tech](http://amarkumartodo.ccbp.tech))**

Developed persistent todo application with CRUD operations to track list of tasks

- Displayed list of todos with HTML list elements, styled todo list using CSS, Bootstrap
- Implemented todo crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects and their methods during todolist CRUD Operations, Persisted todo list state on page reloads using local storage methods.

**Technologies used:** HTML, CSS, JS, Bootstrap

### **Countries Search([amarcountries.ccbp.tech](http://amarcountries.ccbp.tech))**

Developed responsive countries search application which shows all countries and respective population in the world. We can also search by specific country

- Fetched countries list from server asynchronously using fetch GET HTTP API call and implemented responsiveness using Bootstrap grid system and CSS box model.
- - Implemented local search functionality by using input element, JavaScript event listeners & filtered countries using Array filter method.

**Technologies used:** HTML, CSS, JS, REST API Calls, Bootstrap

### **Wikipedia Search Application ([wikipediamar.ccbp.tech](http://wikipediamar.ccbp.tech))**

Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlink as url, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

**Technologies used:** HTML, CSS, JS, REST API Calls, Bootstrap

**securereversewallettracking([securereverse.ccbp.tech](https://securereverse.ccbp.tech))**

To track the transactions of particular address which is given to the search box

**Technologies used:** HTML, CSS, JavaScript, Bootstrap, React.js

## **WORK EXPERIENCE**

---

**Secureverse Technology (Web Developer Intern)**

**Oct 2022 – Apr 2022**

*Work From Home, Delhi*

In this internship we develop a wallet tracking of Etherscan,BscScan.To get the recent Transactions in the web page by transaction address.
